

1. General Information						
1.1 LED Driver identification	PCL80W-MC-Match-1550					
1.2 LED control gear type	Buit in					
1.3 LED configuration	1200mA— channel; Terminals 5—7 1400mA— channel; Terminals 5—6 1550mA — channel ;Default ,Terminals open					
1.4 Type of LED's	1200mA——1400mA——1550mA LED or LED module					
1.5 Type of protection	IP20					
1.6 Suit for Luminaires	Class I					
2. Input (Mains) Specifications						
2.1 Nominal voltage	220240 V _{AC}					
2.2 Nominal frequency	50/60 Hz					
2.3 Min. AC voltage for starting	198 V_{AC} start-up with operating temperature					
2.4 AC operation on	198264 V _{AC}					
2.5 Min. DC voltage for starting	176VDC					
2.6 DC operation on	176276 V _{DC}					
2.7 Surge current	1					
2.8 Rated input power	≤96 W, @220 – 240 V _{AC}					
2.9 Input current	<0.4 A, @220 – 240 V _{AC}					
2.10 Power factor	>0.95, @220 – 240 V _{AC}					
2.11 Input current harmonics	IEC 61000-3-2					
2.12 Total harmonic distortion	≤10 %					
2.13 Full-load efficiency	≥87 %@ 220 – 240 V, 50 Hz					
2.14 No load power consumption	1					
2.15 Leakage current	1					
2.16 Number of mains fuses	1					
3. Output (Mains) Specifications						
3.1 Number of channels	1					
3.2 Rated output power	32 W83 W					
3.3 Min. output voltage	27 V _{DC}					
3.4 Max. output voltage	54 V _{DC}					
3.5 Max. declared output voltage	60V _{DC} (No load protection put output down to roughly2 V)					
3.6 Average nominal output current	1200mA1400mA1550mA					
3.7 Output current tolerance (max)	±10 %					
3.8 Dimming	1

6.	RFI Requirements	
6.1	Disturbance voltages at mains terminals according	EN 55015
	to luminaries of class II (or I)	
6.2	Radiated disturbance voltages	EN55015
7.	Safety Requirements	
7.1	Cree page distance and clearances	IEC 61347-2-13
7.2	Protection against contact with live parts	IEC 61347-2-13
7.3	Voltage at ballast terminal after 1 min	IEC 61347-2-13
7.4	Max. working voltage	IEC 61347-2-13
7.5	Humidity / insulation resistance test	IEC 61347-2-13
7.6	Humidity / high voltage test	IEC 61347-2-13
7.7	Strength against mechanical damage	/
8.	Installation and Wiring	
8.1	Terminals	Push type
8.2	Number of mains terminals	1 with 7 ports
8.3	Number of LED terminals	1 with 4 ports
8.4	Max. diameter of test contacts	1.2 mm
8.5	Cross section of wires (any lead)	0.51.5 mm ² massive leads
8.6	Max. allowed cable capacitance	100 pF
8.7	Max. allowed cable length	1.5 m
8.8	Min. distance between LED drivers	5 cm
•		
9.	LED Driver Case	
9.1	Case material and identification	Hardware, L280D
	Case drawing Number	refer to the attached drawing
	Approx. dimension	L282×W30×H21.5 mm
	Mounting hole distance	L267 mm
9.5		Max. M4
	Ground connection via	1
	Terminal covers	Yes
	Class of protection	IP20
	Labelling	1
9.1(Barcode identification	1
10.	Environmental Requirements	
10.1	-	/
10.2	2 Noise produced by driver during operation	<30 dB at distance 1 m
	3 Labelling of plastic case	Silkscreen

10.4 Absence of dangerous materials

©2016, Global Leader Power Page 3/4

Yes

10.5 After end of life to be treated as

11. Approvals

- 11.1 Approval according to
- 11.2 EMC approval according to

12. Packaging and Transport

- 12.1 Immunity against vibration and shock
- 12.2 Weight (g)
- 12.3 Packing unit

CE、CB、SAA、ROHS

30 pcs/carton

EN 55015
